

## CUTE GARDEN MARKERS

Here's a really cute idea for keeping track of what you have planted in your garden. Grab some cheap wooden spoons and paint the tops of them different colours. Match the colours to your plants! Orange for carrots, red for tomatoes etc. Using a sharpie marker draw a picture of the vegetables and write the name. You will never have to wonder what is growing then!

Another idea is even easier. Just using sticks you can find in the garden or on your walk, use a vegetable peeler to carefully peel a strip at the top of each stick. Just write the name of your plant and pop into the ground!
