

## GROW YOUR OWN CRESS EGGHEADS

### You will need:

- empty egg shells (remove the top of the shell to empty them, leaving a good amount of shell left to use),
- felt pens
- googly eyes (optional)
- cotton wool
- cress seeds
- an empty egg box

### First, give this egghead a face:

1. Carefully wash out the egg shells and sit them in the egg box to keep them steady.
2. Draw some faces onto the shell, with the felt pens and add googly eyes if you have them. Draw your own face, a friend or use your imagination to create exciting or crazy faces. Are they happy, sad, angry or surprised?

### Now, give him some hair:

3. Put some cotton wool inside the shells and dampen them with some water.
4. Sprinkle cress seeds all over the cotton wool.
5. Pop them on a windowsill and wait for the hair to sprout. It'll only take a couple of days.
6. If the cotton wool dries out, add a little bit of water.

Once the 'hair' is fully-grown, give your eggheads a haircut!
