

## JAZZ UP YOUR GARDEN FENCE

Do you have a boring fence at your place? Maybe it's above your veggie garden. This is such a cool idea and a great way to do some recycling too.

Get mum or dad to save some tins but ask them to make sure there are no sharp edges on them. Peel off the labels (you might need to soak them in some water first) and then grab some of your paints and decorate the tins.

They will need some holes in the bottom for drainage and then get some help to attach them to the fence with some screws. Add potting mix, pop in some pretty flowers or veges and watch them grow! Our 10 Pots flowers would be great for these – maybe Petunias or Lobelia which will fall down over the front of the tins and look gorgeous! Just make sure you give them some water when you are watering your veges!
