

COOL PALLET VEGE GARDEN

Do you only have a small backyard?

There's no reason that you can't still have a cool vege garden. Check out this idea using an old pallet.

Some hardware stores or supermarkets might have a pallet that they will let you have for free. You will also need:

- *landscaping fabric (might also be called weed mat)
- *staple gun
- *soil
- *Pohlmans vege seedlings!

Step 1 – Staple the landscaping fabric to the back and sides of the pallet. If the fabric seems to thin, make two layers of the fabric. Be generous with the amount of staples you use so as to prevent soil leakage.

Step 2 – Fill the pallet with soil.

Step 3 – Plant the pallet with your plants
