

MAKE A MACRAME PLANT HANGER

Buddies- making this is not just easy- it's fun too!

What you need:

- A wooden ring
 - 4 strands of yarn, twice the length you want your finished pot holder to be
- A plant in a pot

Thread the four strands of yarn evenly through the ring and knot. Separate the 8 strands into four pairs

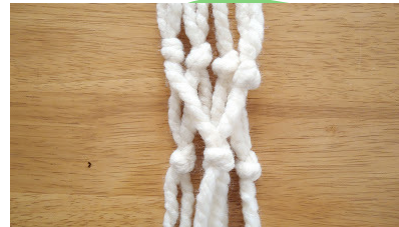

Measure down to the point where you want your pot plant to hang and knot the yarn pairs.

Now knot each strand with a partner from the neighbouring pair

Don't forget to knot the furthest left and right strands together too, so you are essentially creating a ring of knots

Repeat this process once more

Then knot all the ends together and trim tails

Insert your pot plant into this string network you've just created and hang from a hook in the ceiling.
